Classic Series™ Classroom Chairs

Over the years, Virco's 9000 Classic Series™ chairs have become an integral part of our educational landscape. These popular chairs are fixtures in thousands of classrooms across the nation, and around the world. They're available in 12 attractive colors and five seat heights to coordinate with your learning environment. A padded 18" version (model 9018P) is also available.

9600 Series chairs feature a sled-based design that's ideal for carpeted surfaces only. Like our 9000 Series chairs, they stack efficiently for easy storage.

The Classic Series includes four mobile chairs. Model 9050 and padded model 9050P feature a traditional 4-leg design, while padded model 9260PGC comes with a five-point base. As an added convenience, our model 9260PGC has a pneumatic mechanism for instant, ultra-easy adjustments, as does our model 9260GCLS lab stool.

Suggestions are for students of average height and weight.

Seat heights should be measured by calculating the distance from the floor to the top of the front curve of the seat. Measurements should not be taken at the seat's side or rear.

If at all possible, measure the heights of a representative sample of students in each grade prior to each school year. This will help you more accurately determine your specific seating needs as time goes by.

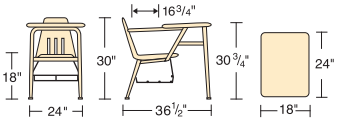
Classic Series™ Chair Desks

Every 9000 Series Virco chair desk gets its strength from a stout 1⅛" tubular steel frame. Versatility comes in your choice of two space-saving tablet arm models, or study top combos with larger work surfaces. Model 9700BR, 9400BR and 9400LABR units have a tied-in arm welded to our tubular steel back support for added strength, while model 9640BR study top combos feature a sled-based design.

Each model is equipped with a durable high-pressure laminate work surface. An underseat steel-rod bookrack is standard on all models.

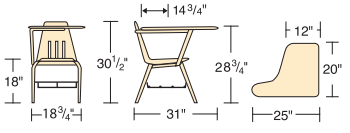
9400BR (shown) and 9400NBR

Virco's model 9400BR gives you a hard-working study top combo with a large work surface. Model 9400NBR comes without a bookrack.



9700BR

When basic economics are a classroom issue, these tablet-arm chair desks come through with cost-saving solutions.



See the accompanying price list for Quick Ship models and color selections.

2000 Series Chairs

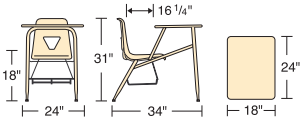
Virco's stackable 2000 Series chairs combine the strength of heavy-gauge tubular steel legs with a smooth polypropylene shell and a comfortably contoured waterfall seat front. They're available in 12", 14", 16" and 18" seat heights for use in all grade levels; an additional 18" model comes with a padded, upholstered seat and back. And if you prefer sled-based chairs, we've got models with four seat heights.

Like Virco's other classroom furniture lines, the 2000 Series includes a selection of chair desks. Our popular model 2700BR features a space-efficient footprint and tablet arm configuration, while the model 2400BR gives you a generous 18" x 24" work surface. If your applications require sled-based seating, our model 2440BR delivers excellent service.

We also offer a 2000 Series mobile task chair with a rugged 5-point base and an easy-to-operate pneumatic height adjustment mechanism.

2400BR (shown) and 2400NBR

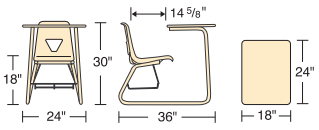
For a chair desk that features a spacious 18" x 24" high-pressure laminate work surface with a welded-on steel-rod bookrack, look no further than Virco's model 2400BR. Model 2400NBR comes without a bookrack.



Plastic glides come standard on model 2440BR.

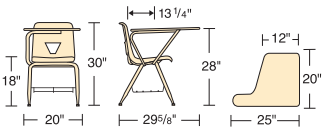
2440BR

Model 2440BR sled-based combos give you the convenience of double-entry seating along with a steel-rod underseat bookrack.



2700BR

With its compact tablet arm configuration, Virco's model 2700BR helps you devise effective space-saving classroom layouts.



See the accompanying price list for Quick Ship models and color selections.

2000 Series EL Models

NEW PRODUCT

In response to educator requests, Virco has expanded our popular 2000 Series classroom furniture line to include several new "EL" (extra large) models with a seating surface that measures 17¼"W x 16¾"D x 16½"H. Along with the 4-leg combo unit and the four chairs shown here, several additional 2000 Series EL models are available, including 4-leg tablet arm models and sled-based combo units. Your Virco representative would be happy to give you more information about all of the new 2000 Series EL product choices.

TELOS®

Designed by Peter Glass and Bob Mills, Telos® classroom furniture brings new life to old materials with seats, backs and work surfaces made from Fortified Recycled Wood™. These scratch-resistant, flameproof, ergonomically sculpted components enable Telos hard plastic furniture to provide new levels of seating comfort.

You can order Telos in your choice of 23 hard plastic seat and back colors, seven work surface patterns and three frame finishes. This exciting color palette works with elegantly contoured Telos products to enliven any learning environment.

Because Fortified Recycled Wood™ can be formulated with materials reclaimed through Virco's ground-breaking Take-Back program, Telos products help to "close the loop" by extending the service life of renewable materials. All Telos models are among the hundreds of Virco products certified by the stringent GREENGUARD® for Children and School Program for indoor air quality.

Fortified Recycled Wood™

See page 11 for information on Fortified Recycled Wood™.

Children & Schools GREENGUARD® Indoor Air Quality Certified

"Nature...makes nothing in vain..."
-- Aristotle

Telos® Features

Engineered for Durability

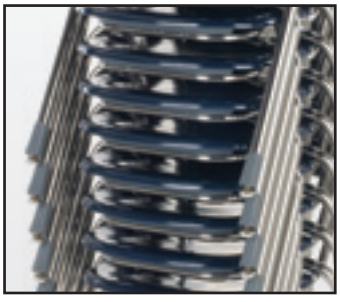
All Telos models have a heavy-gauge frame with a tubular steel backrest and locking front-U for full-perimeter seat support. Sturdy polypropylene spacers help to align the seat and frame and distribute stresses for extended product life.

Contoured Seat and Back

The ergonomically sculpted Telos seat and back provide exceptional support. A smooth waterfall front and a wide, deeply relieved seat readily accommodate a range of body types, while the generously contoured back delivers long-lasting comfort.

Off-The-Floor Nesting

Telos 4-leg chair models enable easier access for classroom cleaning. These models can be readily positioned on a desktop, as shown above, or arranged in 10-high stacks, as illustrated in the adjacent photo.



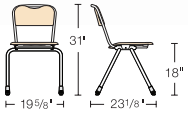
Truly Vertical Stack

Telos achieves new levels of stackability for hard plastic seating. All 4-leg Telos chair models can be arranged in 10-high, truly vertical stacks. Model N318 chairs can be stacked 10-high for use with selected Virco chair trucks.

Telos® Stack Chairs

Fixed-height Telos® chairs come in four sizes for pre-K through high school settings. The contoured seat and back provide outstanding comfort for hard plastic chairs. Since students spend more time in their classroom chairs during the day than in any other seat, that's especially important. With Telos, your students get excellent ergonomic support from a deeply relieved seat, a waterfall front and a generous back surface. We invite you and your students to "test sit" a Telos chair to feel the difference!

N318



Superior Stacking Capabilities

Unlike other hard plastic seating products, Telos 4-leg chairs can be arranged in 10-high vertical stacks. In addition, model N318 Telos chairs can stack 10-high for use with selected Virco chair trucks.

See page 281 & 283 for information on chair trucks. Please refer to page 315 for "Guidelines for Stacking & Moving Furniture."

ZUMA*frd*™

Wood Into Stone

The active forces of compression molding – heat and pressure – are also the active forces of the earth's most fundamental regenerative processes. When applied to igneous or sedimentary rocks, they yield a new form, metamorphics, that bears witness to the tumult that created them.

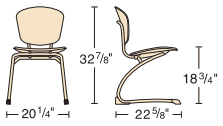
These same forces have the ability to turn wood into molten plastic, then into stone, and nearly into glass. Wood that is soft, broken, and no longer of structural utility can thus be changed into nearly indestructible seats, backs and work surfaces.

Compression-molded components have been used in classroom furniture for many years, but until now they've always been restricted to simple linear designs because of the limited flow characteristics of resin and wood particle blends.

Contact your Virco representative for more information on Virco's new ZUMAfrd product line.

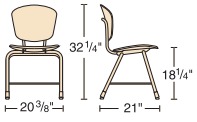
ZFRDCANT18

The ZUMA*frd* cantilever chair's elegance and ergonomic contours bring balance and support to educational environments.



ZFRD418BR

Pick up this 4-leg chair and you'll be reminded of the heft of solid oak; its functional design transcends time and fashion.



Children & Schools GREENGUARD® Indoor Air Quality Certified

Clean Air Standards

ZUMAfrd and ZUMA® were the first classroom furniture lines to earn GREENGUARD® Children & Schools certification for indoor air quality. Now, hundreds of Virco models have earned Greenguard certification. Visit www.greenguard.org to view all of Virco's Greenguard-certified furniture lines, and to learn more about Greenguard.

See the accompanying price list for Quick Ship models and color selections.

ALL products on this page are GREENGUARD® Certified

By combining proprietary chemistry with innovative mold design and process control, ZUMAfrd™ models – which feature seats, backs and work surfaces made from Virco's exclusive Fortified Recycled Wood™ hard plastic – transcend these limitations to yield a new generation of compression molded furniture with the following attributes:

- ZUMA*frd* contains up to 70% recycled material, depending on the model and specifications.
- ZUMA*frd* is 98% fabricated, recycled, and assembled in our own U.S. factories, both of which meet the highest standards of environmental compliance and social equity.
- ZUMA*frd* is also 98% recyclable at the end of its long service life – only the glides cannot be easily recycled.
- Once processed, components of Fortified Recycled Wood are virtually inert, allowing them to meet the most stringent standards for flame resistance and low emissions. They've also enabled all ZUMA*frd* models to earn the GREENGUARD Indoor Air Quality Certified Mark® as products that meet the stringent indoor air quality standard established by the GREENGUARD Environmental Institute for children and schools.
- Seats and backs are available in the exciting colors shown at right.
- Work surfaces are available in over 300 custom patterns for projects with sufficient lead times.

ZFRDCONBR

With stout, sustainable Fortified Recycled Wood components, the ZUMA*frd* combo desk is ideal for high-intensity classrooms.

Martest 21® Chair Desks

Virco's hard plastic chair desks give you the added strength and long-lasting color of Martest 21® seats, backs and work surfaces. They're available in an assortment of models featuring a 1⅛" tubular steel frame and a welded-on, steel-rod bookrack.

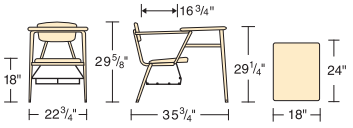
Our model 3700BR features a convenient, space-saving tablet arm, while model 3400BR offers a larger 18" x 24" work surface. Model 3400LABR extends the work surface to provide full-length arm support. Each of these units features a tied-in arm welded to our tubular steel back support for added strength.

When you need sled-based seating, our model 3640BR study top combo lets students enter their seats from either side of the unit.

Glides are standard on all sled-based combo models.

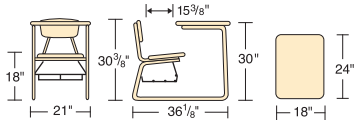
3400BR (shown) and 3400NBR

An 18" x 24" work surface makes model 3400BR study top combos best sellers in upper grades. Model 3400NBR comes without a bookrack.



3640BR

Convenient double-entry seating and a sled-based design let you use 3640BR study top combos in a variety of classroom configurations.



3640BR Series Chair Desk Feature

Plastic glides come standard on model 3640BR.
